PROFESSIONAL PROFILE

Product Design graduate with postgraduate studies in Advanced Manufacturing Engineering 4.0 and experience in industrial 3D printing applications. Background in parametric modeling, reverse engineering, technical part development, prototyping and documentation. Interested in technical opportunities in Brazil and abroad.

TECHNICAL SKILLS

Fusion 360 · Parametric modeling · Dimensional assessment · Reverse engineering · Technical drawings · DfAM · Prototyping · FDM and resin printing · Material selection · Slicing · Technical reports

PROFESSIONAL EXPERIENCE

3DCRIAR | Additive Manufacturing Analyst I - Engineering Modeler

July 2024 - present

- CAD modeling of replacement parts and components for industrial applications.
- Preparation and optimization of 3D printing files and application follow-up.
- Case assessment, process mapping and identification of additive manufacturing opportunities.
- Materials and consumables management, reports and technical documentation.

Fribal | Project Assistant

April - June 2024

Support with requirements gathering, schedules, spreadsheets, presentations and project documentation.

Earlier experience at Fribal (2014-2024): customer service, administration and billing.

EDUCATION

Postgraduate studies in Advanced Manufacturing Engineering 4.0

Anhanguera Educacional | October 2024 - April 2026

Undergraduate degree in Product Design

Cruzeiro do Sul Virtual | 2021 - April 2024

PERSONAL PROJECT

RadioMaster T8L controller stick tip: CAD geometry development and preparation for additive manufacturing, with manufactured part photos and a 3D model in the portfolio.
